

Best Seat at Natural Bridge

Since 1967, the Skylift at Natural Bridge State Resort Park has provided visitors the opportunity to experience some of nature's most awe-inspiring handiwork. Located amidst the scenic and world renowned Daniel Boone Natural Forest and Red River Gorge Geological Area, the skylift takes you on a 1/2 mile journey through spectacular mountain scenery. Once at the top, you are within easy walking distance of over 900 tons of sandstone molded by nature into a 30-ft wide skywalk now known as Natural Bridge. A right turn from the top platform takes you on a 1200ft scenic footpath to Lookout Point, a magnificent viewing area and the best place to photograph Natural Bridge.

Be sure to visit the gift shop behind the ticket office. Twelve flavors of country fresh fudge, t-shirts, hats and crafts from the area as well as other unique items are available for purchase.

Matthew and Mary Beth got married on top of Natural Bridge.
